## PUBLICATIONS

- **A. Humayun**, B. Zubair, M. Mustafa. *Beyond Euphemisms: Rethinking LLMs for SRH in Conservative Contexts*. CHI '26, Barcelona. (CORE A\*; presented in person, **supported by the Gates Foundation**.)
- S. Shanza, **A. Humayun**, U. Hengartner, L. Zhang-Kennedy. *Sharing Digital Devices is Normal and Cultural: Privacy and Security Challenges in Collectivist Immigrant Households*. SOUPS '26, Hannover. (CORE A\*; accepted, to appear.)
- Co-first author, study of conversational AI safety in patient-facing healthcare. (In submission, *Nature Health*.)

## AWARDS, SERVICE & TEACHING

|                                                                        |                 |
|------------------------------------------------------------------------|-----------------|
| <b>Gary Marsden Travel Award</b> , SIGCHI                              | February 2026   |
| <b>Student Volunteer</b> , CHI 2026, Barcelona                         | April 2026      |
| <b>Teaching Assistant</b> , CS 5606: Designing Human-Centered AI, LUMS | Jan – June 2026 |

## RESEARCH & UX EXPERIENCE

|                                                                                                                                                                                       |                              |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|
| <b>Safe Interactions Lab, University of Waterloo</b> — Research Assistant<br><i>Shared-device privacy &amp; UX (SOUPS '26)</i> — Advisors: Dr. Leah Zhang-Kennedy, Dr. Urs Hengartner | Nov 2025 – Present<br>Remote |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|

- Co-led qualitative research on shared-device use in collectivist immigrant households; **accepted to SOUPS 2026 (CORE A\*)**.
- Analyzed 41 interviews / 18 families via reflexive thematic analysis; delivered design recommendations for multi-user auth, identity-aware access, and configurable privacy.

|                                                                                                                                       |                                        |
|---------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|
| <b>Interactive Media Lab, LUMS</b> — Research Lead<br><i>AI-mediated health communication (CHI '26)</i> — Advisor: Dr. Maryam Mustafa | May 2025 – Present<br>Lahore, Pakistan |
|---------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|

- Led mixed-methods research on AI-mediated health comms in conservative, low-resource contexts; **accepted to CHI 2026 (CORE A\*)**, presented in Barcelona, **funded by the Gates Foundation**.
- 22 interviews, 5 focus groups, 40 contextual observations; built the *Domain-Approach* framework for how users discuss sensitive health topics, informing interface & prompt design.
- Evaluated 5 AI systems (Claude Sonnet 4, GPT-4o, GPT-OSS, Gemma 3, LLaMA 3.2) on 71 real utterances, dual-rater; documented user-facing failure modes and design fixes (terminology management, miscommunication-as-default, multimodal input).

|                                                                                                                                                                  |                                        |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|
| <b>Interactive Media Lab, LUMS</b> — Research Lead<br><i>Conversational AI safety in healthcare (Nature Health, in submission)</i> — Advisor: Dr. Maryam Mustafa | May 2025 – Present<br>Lahore, Pakistan |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|

- **Co-first author**; 13 expert interviews (OB/GYNs, radiologists) yielding a four-pathway harm model for how AI disclosure decisions cascade into real-world harm.
- Designed a 3-condition evaluation (single-/6-/18-turn adversarial) exposing failure modes invisible to single-turn benchmarks (100% hallucinated disclosure from Gemini vs. full refusal from Claude) — informing product-safety decisions.

|                                                                                                                                       |                          |
|---------------------------------------------------------------------------------------------------------------------------------------|--------------------------|

|---------------------------------------------------------------------------------------------------------------------------------------|--------------------------|

- 45+ interviews and usability studies across *Rehnuma* (accessibility ratings, w/ PSRD), *Safarnama* (cultural tourism), *TurboTrack* (booking system); user research, design, prototyping, testing. Tools: *Figma*, *HTML/CSS*, *Atlas.ti*.

## SKILLS & INTERESTS

**Research Methods:** Semi-structured & expert interviews, focus groups, contextual inquiry, reflexive thematic analysis, usability testing, codebook development  
**AI / LLM Evaluation:** Single-turn, multi-turn & adversarial auditing, dual-rater scoring, failure-mode analysis  
**Tools:** Atlas.ti, MAXQDA, Dedoose, Figma, Miro, Zotero, LaTeX/Overleaf, Nomad Sculpt, Canva, Procreate, Blender  
**Programming:** Python, C/C++, React, HTML/CSS, MATLAB, Git  
**Interests:** Culturally-grounded LLMs, health AI, human-centered AI, fairness & equity, security & privacy  
**Languages:** Urdu, English, Punjabi, Hindi
